

Dispenser

P2000™

# P2000™

## Dispenser

### Sophisticated Design in a Premium Quality Dispenser

Calmar's P2000™ provides outstanding technical performance, sophisticated design and the versatility to meet the market's need for high quality, user-friendly dispensers.

The remarkable integrity of seals, high suction ability and unique design of the P2000, which shields products against water ingress, make the P2000 a premium quality dispenser. It has been specially designed to be compatible with many formulas; the spring does not come in contact with the product and the ball is made of a non-reactive material. And Calmar technology makes it easy to lock the dispenser in the up or down position.

The closure, head and output of the P2000 can be easily customized to meet your specific requirements.

### Features & Benefits

- Versatile and easy to use
- Compatible with many product formulas
- Design protects against water ingress
- Can be shipped in either up or down lock position
- Head, closure and output can be easily customized
- White is standard color; other colors\* available

\* surcharge applies

### General Information

**Delivery Volume per Stroke** – Nominal 1.5 and 2 ml.

**Colors** – Available in standard white or customer-specified custom colors.

**Closure Sizes** – Available in all standard 24mm and 28mm closure sizes; smooth or ribbed.

**Carton** – 32 ECT single-wall bliss 19-1/2" x 13-3/16" x 15-1/2". 2.6 cu. ft. Lined with polyethylene bag.

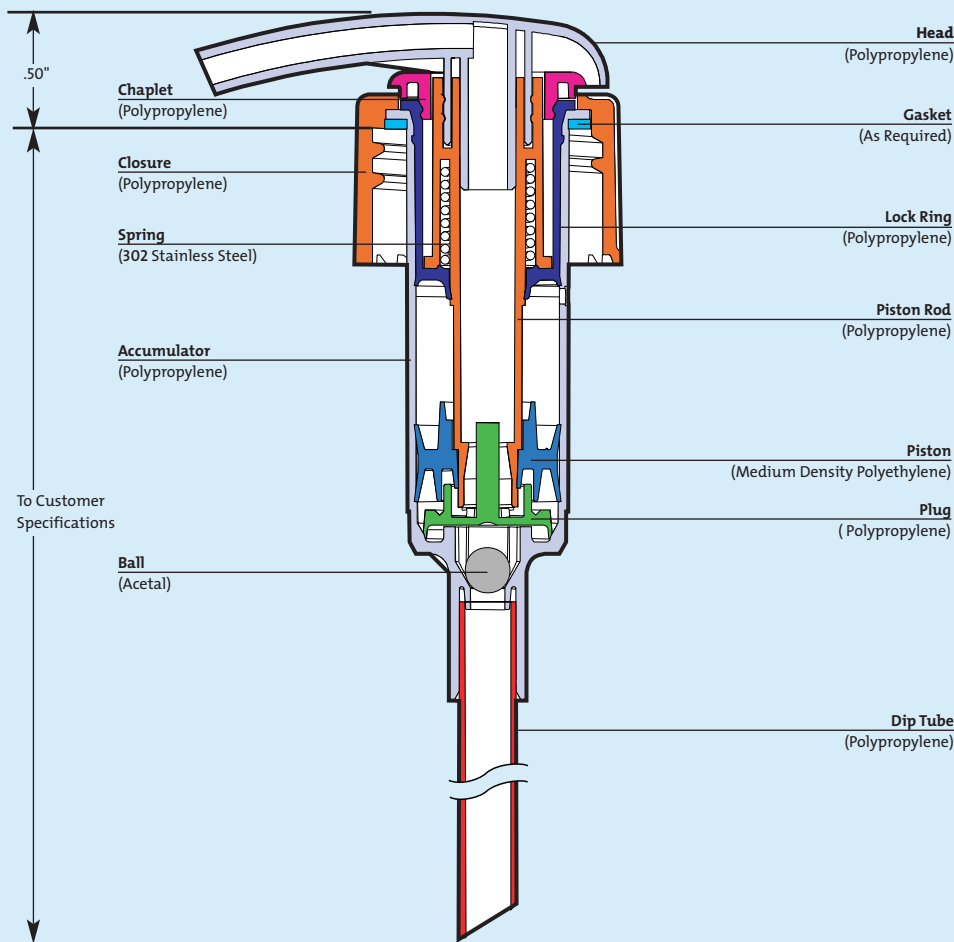

**Pack and Weight** – Varies with cap size and tube length. Typical pack is 600 units per carton, weighing 28-30 lbs.

**Pump to Container Seal** – Supplied with an optional gasket as required. Tests have proven this a very effective seal for plastic and glass containers.

**Material Specifications** – All materials comply with Code of Federal Regulations food standards. The materials used for key components are compatible with most aqueous and alcohol products. However, if there are any questions or concerns, thorough testing is recommended. Calmar offers complete laboratory testing assistance and provides recommendations to assist customers with their final packaging decision.

### For Your Custom Needs...

Calmar can help you satisfy unique product specifications and marketing demands that can't be addressed by standard configurations. Call your Calmar sales representative for details.
